Any person subsequently offering, selling or recommending the Securities (a "**distributor**") should take into consideration the manufacturer's target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Securities (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Certificates, including:

1. Risk relating to the structure of the Certificates:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of automatic early redemption features. Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until redemption. The effect of leverage on the Securities may be either positive or negative. Open End Certificates and OET Certificates do not have any pre-determined maturity and may be redeemed on any date determined by the relevant Issuer and investment in such Open End Certificates and OET Certificates entails additional risks compared with other Certificates due to the fact that the redemption date cannot be determined by the investor.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities: exposure to one or more index, adjustment

events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Certificates:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Produits à effet de levier : Les investisseurs peuvent être exposés à une perte partielle ou totale de leur investissement. Le rendement de ces Titres dépend de la performance du ou des Sous-Jacent(s) de Référence, plus particulièrement en fonction du niveau de remboursements automatiques anticipés. De plus, le rendement peut dépendre d'autres facteurs de marché tels que les taux d'intérêt, la volatilité implicite du Sous-Jacent de Référence, et la durée avant l'échéance. L'effet de levier de ces Titres peut être soit positif soit négatif. Les Certificats Open End et les Certificats OET n'ont aucune échéance prédéterminée et peuvent être remboursés à toute date déterminée par l'Émetteur concerné et l'investissement dans ces Certificats Open End et ces Certificats OET entraîne des risques additionnels par rapport à d'autres Certificats, en raison du fait que la date de remboursement ne peut pas être déterminée par l'investisseur,

2. Risque relatif au Sous-jacent et à ses Perturbations et Ajustements :

Les Titres Indice sont liés à la performance d'un indice sous-jacent (un « Indice »), qui peut faire référence à diverses classes d'actifs comme des actions, des obligations, des taux de change ou des données de prix de biens, ou peuvent faire référence à une combinaison de classes d'actifs. Les investisseurs dans des Titres Indice sont exposés au risque d'un large ensemble de circonstances ce qui fait que la performance des actifs sous-jacents de l'Indice n'est pas celle attendue en comparaison avec un investissement dans des titres de créance classiques. Par conséquent, la probabilité que le rendement d'un investissement dans des Titres Indice soit affecté négativement est plus élevée que pour un investissement dans des titres de créance classiques : l'exposition à un ou plusieurs indices, un cas d'ajustement et de perturbation du marché ou le défaut d'ouverture d'une bourse, qui peuvent avoir un effet défavorable sur la valeur de la liquidité des Titres, et le fait que l'Émetteur ne fournira pas d'informations post-émission sur le Sous-Jacent de Référence.

3. Risque relatif aux marchés sur lesquels sont négociés les Titres :

Facteurs affectant la valeur et le cours des Titres : Le cours des Titres peut être affecté par un certain nombre de facteurs dont, notamment, le prix, la valeur ou le niveau de la ou des Références Sous-jacentes, le temps restant jusqu'à la date de remboursement prévue des Titres, la volatilité réelle ou implicite associée à la ou aux Références Sous-jacentes et le risque de corrélation de la ou des Références Sous-jacentes concernées. La possibilité que la valeur et le cours des Titres fluctuent (de manière positive comme négative) dépend d'un certain nombre de facteurs, que les investisseurs doivent examiner attentivement avant d'acheter ou de vendre des Titres.

4. Risque juridique :

Assemblées générales : Les modalités des Titres contiendront des dispositions relatives à la convocation d'assemblées générales des titulaires de ces Titres, afin d'examiner des questions affectant leurs intérêts en général. Ces dispositions permettront à des majorités définies de lier tous les titulaires, y compris ceux qui n'auront pas assisté et voté à l'assemblée concernée et ceux qui auront voté d'une manière contraire à celle de la majorité.

Principaux conflits d'intérêts liés à l'offre ou à l'admission à la négociation

Tout Agent Placeur et ses affiliés peuvent aussi avoir été impliqué, et pourrait dans le futur être impliqué, dans des transactions de banque d'investissement ou commerciale avec, ou lui fournir d'autres services à, l'Émetteur et son Garant et leurs affiliés dans le cours normal de leurs activités.

Diverses entités au sein du groupe BNPP (y compris l'Émetteur et le Garant) et les Sociétés affiliées assument différents rôles en rapport avec les Titres, notamment celui d'Émetteur des Titres et d'Agent de Calcul des Titres et peuvent également s'engager dans des activités de négociation (y compris des activités de couverture) relatives au Sous-jacent et à d'autres instruments ou produits dérivés basés sur le Sous-jacent, ou liés à celui-ci, qui peuvent donner lieu à des conflits d'intérêts potentiels.

BNP Paribas Financial Markets SNC, qui agit en tant que Gestionnaire et Agent de Calcul, est une Société affiliée de l'Émetteur et du Garant, et des conflits d'intérêts potentiels peuvent exister entre elle et les titulaires de Titres, y compris en ce qui concerne certaines décisions et jugements que l'Agent de Calcul doit prendre. Les intérêts économiques de l'Émetteur et de BNP Paribas Financial Markets SNC en tant que Gestionnaire et Agent de Calcul sont potentiellement contraires aux intérêts des Titulaires en tant qu'investisseurs dans les Titres.

De verplichtingen ingevolge de Garantie zijn een senior preferente verplichting (in de zin van Artikel L.613-30-3-I-3° van de Franse Code monétaire et financier) van BNPP en zullen van gelijke rang zijn (*pari passu*) ten opzichte van haar overige huidige en toekomstige senior preferente en ongedekte verplichtingen behoudens uitzonderingen die op grond van de Franse wet verplicht dienen te zijn. In geval van een bail-in van BNPP maar niet BNPP B.V., zullen de verplichtingen en/of bedragen die door BNPP ingevolge de garantie verschuldigd zijn, worden verminderd ter weerspiegeling van een dergelijke wijziging of vermindering als toegepast op de passiva van BNPP voortvloeiende uit de toepassing van een bail-in van BNPP door een betreffende toezichthouder (met inbegrip van een situatie waarbij de garantie zelf niet onderworpen is aan een dergelijke bail-in).

De Garantieverstrekker zal, in overeenstemming met de Voorwaarden dat bedrag betalen in de valuta waarin dat bedrag verschuldigd is in direct beschikbare fondsen of, zoals het geval kan zijn, de prestaties van de betreffende verplichting uitvoeren of ervoor zorgen op de vervaldatum van deze prestatie.

Meest materi le risicofactoren eigen aan de garant

1. Een substanti le toename van nieuwe provisies of een leemte in het niveau van eerder geboekte provisies, blootgesteld aan kredietrisico en tegenpartijrisico, kan van negatieve invloed zijn op de resultaten van operaties en de financi le situatie van BNP Paribas Groepe.
2. Het beleid, de procedures en de methoden voor risicobeheer van de BNP Paribas Groep kunnen ertoe leiden dat de Groep wordt blootgesteld aan niet-geidentificeerde of niet-voorzien risico's, wat kan leiden tot aanzienlijke verliezen.
3. BNP Paribas Groep kan significante verliezen lijden op haar handels- en investeringsactiviteiten als gevolg van marktfluctuaties en volatilit it.
4. De toegang van BNP Paribas Groep tot financiering en financieringskosten kunnen negatief beïnvloed worden door een herhaling van financi le crises, die op haar beurt de economische omstandigheden verslechteren, en verdere ratingverlagingen, toenames in kredietrisico's of andere factoren teweeg kunnen brengen.
5. Ongunstige macro-economische en financi le omstandigheden hebben in het verleden aanzienlijke gevolgen gehad en kunnen in de toekomst een aanzienlijke impact hebben op de BNP Paribas Groep en de markten waarin zij actief is.
6. Wetten en richtlijnen die in de afgelopen jaren zijn aangenomen, alsmede de huidige en toekomstige wet- en regelgeving, kunnen aanzienlijke gevolgen hebben voor de BNP Paribas-groep en het financi le en economische omgeving waarin zij actief is.
7. Als de BNP Paribas Groep er niet in slaagt haar strategische doelstellingen te implementeren of haar gepubliceerde financi le doelstellingen te behalen, of als haar resultaten niet de verwachte verklaarde trends volgen, kan dit een negatieve invloed hebben op de handelsprijs van haar effecten.

Wat zijn de voornaamste risico's specifiek voor de effecten?

Meest materi le risicofactoren die specifiek zijn voor de effecten

Ook aan de Certificaten zijn risico's verbonden, waaronder:

1. Risico met betrekking tot de structuur van de Effecten:

Leverage-producten:

Beleggers lopen het risico hun belegging geheel of gedeeltelijk te verliezen. Het rendement op de Effecten is afhankelijk van de prestaties van de Onderliggende Referentiewaarde(n) en de toepassing van automatische vervroegde aflossing skenmerken. Tevens kan het rendement afhangen van andere marktfactoren, zoals

rentevoet, de impliciete volatiliteit van de Onderliggende Referentiewaarde(n) en de tijd die resteert tot aflossing. Open End Certificaten en OET Certificaten kennen geen vooraf vastgestelde looptijd en kunnen op elke, door de te goeder trouw en op zakelijk redelijke wijze handelende Emittent, vastgestelde datum worden afgelost, en een belegging in dergelijke Open End Certificaten en OET Certificaten brengt extra risico's met zich mee ten opzichte van andere Certificaten, gezien het feit dat de aflossingsdatum niet door de belegger kan worden bepaald;

2. Risico met betrekking tot de Onderliggende referentie en haar Disruptie en Correcties:

Index Trackers zijn verbonden aan de prestaties van een onderliggende index (een "Index"), die kan bestaan uit verschillende financiële activa, zoals obligaties, aandelen, valutakoersen, of onroerendgoedprijzen, of kunnen betrekking hebben op een mix van vermogenscategorieën. Beleggers in Index Trackers worden geconfronteerd met de risico's van een uitgebreidere reeks omstandigheden, dit betekent dat de onderliggende activa van de Index niet presteren zoals verwacht, vergeleken met een investering in conventionele schuldbrieven. Dientengevolge is het aannemelijker dat het rendement van een belegging in Index Trackers ongunstig wordt beïnvloed dan een investering in conventionele schuldbrieven: blootstelling aan een of meer indices, aanpassingsgebeurtenissen en verstoring van de markt of het niet opengaan van een beurs, hetgeen van nadelige invloed kan zijn op de waarde en liquiditeit van de Effecten en dat de Emittent geen informatie na uitgifte ten aanzien van de Onderliggende Referentiewaarde verstrekt.

3. Risico's met betrekking tot de handelsmarkten van de Effecten:

Factoren die van invloed zijn op de waarde en beurskoers van Effecten: De beurswaarde van de Effecten kan door diverse factoren worden beïnvloed, waaronder de betrokken prijs, de waarde of het niveau van de Onderliggende Referentie(s), de resterende looptijd tot aan de afgesproken aflossingsdatum van de Effecten, de huidige of geïmpliceerde volatiliteit behorend bij de Onderliggende Referentie(s), en het correlatiecoëfficiënt van de betrokken Onderliggende Referentie(s). De kans dat de waarde en de beurskoers van de Effecten zullen fluctueren (ofwel positief, ofwel negatief), is afhankelijk van een aantal factoren, die beleggers zorgvuldig moeten afwegen alvorens over te gaan op de aankoop of verkoop van Effecten.

4. Juridische risico's:

Vergaderingen - De voorwaarden van de Schuldeffecten zullen bepalingen bevatten voor het oproepen van vergaderingen van houders van dergelijke Schuldeffecten om te beraadslagen over aangelegenheden in hun algemeen belang. Krachtens deze bepalingen kunnen bepaalde omschreven meerderheidsbesluiten bindend zijn voor alle houders, met inbegrip van de houders die de relevante vergadering niet bijwoonden of daar geen stem uitbrachten en houders die een van de meerderheid afwijkende stem hebben uitgebracht.
